Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,975,711 to Parker et al.

Parker discloses an integrated display panel assembly that includes a PCB, embedded LEDs, a light transmissive material, reflective material and means of disposing the LEDs on the PCB.

Regarding claim 1, An LED backlight module (4), comprising:
a printed circuit board (12);
a plurality of LEDs disposed on the printed circuit board (column 4, lines 41-45);
a light transmissive material coating on the printed circuit board (column 5, lines 10-11),
wherein the LEDs are embedded in the light transmissive material (column 4, lines 50-56).

Regarding claim 3, according to claim 1, wherein the LEDs are disposed on the printed circuit board by means of Surface Mount Technology (column 4, lines 57-67).

Regarding claim 4, according to claim 1, wherein the printed circuit board has a reflective material disposed thereon to reflect light (column 6, lines 23-27, 36-39, 49-51).

Regarding claim 6, according to claim 1, further comprising a plurality of spacers implanted on the surface the light transmissive material (column 3, lines 12-24).

Allowable Subject Matter

Claims 2 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 2, according to claim 1 adds the limitation that the LEDs are arranged on the printed circuit board in a matrix. This limitation combined with claim 1 limitations is not found or taught in the art of record.

Claim 5, according to claim 1, adds the limitation that a plurality of spacers are implanted in the light transmissive material. This limitation combined with claim 1 limitations is not found or taught in the art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPN 5,921,652 to Parker et al.
